

C&T Multimedia Facilities

CD Mastering & Master Copy Service

C&T Multimedia Facilities is equipped to handle all your mastering requirements, from simple one-run masters to high-end productions in just about every format currently available on the market, including online, upload and download facilities.

All projects are managed smoothly and efficiently, and we can take care of new compilations using multiple sources, also offering safety copy management, complete order and shipping tracking, as well as a 24-hour turnaround service.

Music Restoration, Transfers & Enhancements

Whether your source material requires post-processing to make it sound just right or a complete transfer and restoration program, C&T offers everything you need from finalizing services and level adjustments all the way to advanced editing, de-noising, de-clicking and frequency enhancements. From old 78rpm discs to digital audio files, we will do everything to ensure you get the best sound out of your music.

C&T offers restoration services not only for one-off pre-masters, but also on a track-by-track or entire catalogue basis.

CD+G & Karaoke Synchronization

C&T specializes in karaoke and general purpose multimedia productions on CD-ROM, CD+G, VCD, SVCD and DVD. Whether you are looking to repurpose your existing music catalogue for karaoke use, want your corporate video or PowerPoint presentation on CD-ROM or have even more advanced requirements, C&T can handle the entire production for you all the way to finished product.

CD & DVD Replication & Duplication

As well as the high quality service we offer for high-volume disc manufacturing productions, C&T is able to offer a quick turnaround on low-volume CD or DVD duplication based on an in-house service.

Content, Repertoire & Master Management

Content management comes with repertoire, master, contract and licensing management.

At C&T this means the management of your data on tailor-made databases specifically designed and tweaked to suit your needs.

Content Management Software

At C&T, we use our own content management software, developed and shaped in order to run alongside your existing systems. Whether you manage the software yourselves, online or leave it with us, you can be sure that your data will be well looked after and organised just the way you want it.

Royalty Accounting Software

If you have contracts, containing rights and restrictions for different territories, etc. – these can be entered into your tailor-made database, linking directly to licensing and royalty administration databases. These can handle incoming and outgoing royalty accounting at the push of the button or on pre-assigned dates, offering the ideal solution for repertoire owners and record companies alike.
